# EFETP website launched:

<http://www.ehnri.gov.et/efetp/>

The image shows a screenshot of the EFETP website homepage. At the top, there is a dark blue navigation bar with links for "EHNRI HOME", "PHOTO GALLERY", "USEFUL LINKS", and "SITEMAP". A search bar is located on the right side of this bar. Below the navigation bar is a large blue banner featuring the EFETP logo in red and white, with the text "Ethiopia Field Epidemiology Training Program" underneath. To the right of the logo is a smaller graphic with the text "Ethiopia Field Epidemiology Training Program" and three small images: a group of people, a person working in a field, and a map of Ethiopia. Below the banner is a dark blue navigation bar with links for "HOME", "ABOUT EFETP", "COURSES", "OUR PARTNERS", "PROGRAMS", "PUBLICATIONS", and "CONTACT US". The main content area is divided into two columns. The left column features a 3D rendering of several groups of stylized human figures in white and blue, with one group of blue figures standing on a red target symbol. The right column contains a promotional banner for "THE FIFTH AFENET SCIENTIFIC CONFERENCE" held from 17-22 November 2013 in Addis Ababa, Ethiopia. The banner includes the AFENET logo and the theme: "Addressing Public Health Priorities In Africa through FELTPs".

Addressing Public Health Problems in Africa through AFETP

**Welcome to the Ethiopia Field Epidemiology Training Program**

The Ethiopia Field Epidemiology Training Program (EFETP) is a comprehensive two-year competency-based post-graduate training and service program designed to build sustainable public health expertise and capacity. Inaugurated in February 2009, the EFETP has been tailored to the needs and priorities of Ethiopia, and is a partnership between the Federal Ministry of Health, Addis Ababa University School of Public Health, the Ethiopian Public Health Association and the U.S. Centers for Disease Control and Prevention (CDC).

Residents in the EFETP investigate disease outbreaks, develop effective prevention and control measures, and work with disease surveillance systems to establish data-derived information about the health burden of reportable diseases.

Graduates of the program receive a Master of Public Health degree in Field Epidemiology and are assigned to positions that provide epidemiologic service to the Ministry of Health...
